#### **About the presentation**

As the topic is related to the restorative dentistry and addressing the most common  
disorders regarding the oral health worldwide, it is crucial in our daily protocol to define our  
approach on the treatment protocols enrolled. Regarding today's, dentistry with an increasing  
number of female dentists and with dozens of improvements in the material science beside, we can  
have an opportunity to present a different way of thinking and evaluating our clinical protocols.
